Event overview

July 17, 2025

4:00 pm to 5:00 pm

This workshop is for youth in grades 6 – 7. No prior experience is necessary.

Interested in Python and art? Join us for an introductory workshop where you will learn how to use Python to create beautiful digital artwork. Using Python Turtles, you will write Python programs that generate creative designs while learning foundational programming concepts. By the end of the session, you will have your very own digital masterpiece to share!

City Library is partnering with [Koala Koders](#) to offer this program. Koala Koders was founded in 2022 by local teens Nicole Zhang and Daniel Kim to provide free coding education to kids and teens in Metro Vancouver. Nicole has extensive experience teaching computer science at Under the GUI Academy and Thinkland.AI. Daniel works at Steamoji as a curriculum developer and learning facilitator and has achieved high awards in math and computer science contests.
