## Event overview

July 10, 2025

4:00 pm to 5:00 pm

This is a program for children going into grades 3 - 5. Beginners welcome!

Ready to build your own game? Dive into Scratch programming and design a fun video game from scratch. You'll learn how to create characters, add animations and program game logic while developing problem-solving skills. Perfect for beginners who want to bring their gaming ideas to life!

City Library is partnering with [Koala Koders](#) to offer this program. Koala Koders was founded in 2022 by local teens Nicole Zhang and Daniel Kim to provide free coding education to kids and teens in Metro Vancouver. Nicole has extensive experience teaching computer science at Under the GUI Academy and Thinkland.AI. Daniel works at Steamoji as a curriculum developer and learning facilitator and has achieved high awards in math and computer science contests.

Please note that caregivers of children younger than 10 must remain in the library during the program.

Registration is closed.
