Event overview

Online event

October 16, 2025

7:00 pm to 8:30 pm

This is a hybrid program. You can attend in person or via Zoom.

There have been many advances in artificial intelligence since its public release in 2022. Keeping up can be difficult. If you'd like to get caught up on the current state of AI please join us. This introductory class will provide a brief history of AI, review some of the most common platforms and applications, and give you some tips for using AI safely.

This class is a lecture with some demonstrations; we will not be doing any hands-on activities.

You can attend in person or via Zoom. Each person must register individually. Registration is required for virtual participation; the Zoom link will be sent to the email used to register.

Registration is highly recommended for in-person attendance. Space is limited.

Registration is closed.
