Event overview

March 20, 2026

11:00 am to 12:00 pm

Join us for a family-friendly workshop where we'll use our design, innovation, and problem-solving skills to create catapults out of popsicle sticks, elastic bands, and other recycled materials, then test our creations out by launching marshmallows at one another! This is a fun STEM activity for kids and parents alike. This program is intended for children aged 5-10. All children must be accompanied by a parent or guardian. Supplies will be provided. This is a drop-in program, no registration is required, but space is limited so be sure to show up on time!
