Event overview

Online event

March 13, 2026

10:30 am to 12:00 pm

Learn what cloud computing is and how it can be really useful. We'll look at some of the cloud services you may already be using and take some of the fog out of your understanding of the cloud. This class will focus on using the cloud to store and share your documents and photos.

This is a hybrid class — you can attend in person or via Zoom. There are 12 in-person spots; dropping-in will be available if space permits. Individual registration only. Registration is required for online attendance; links will be sent to the email address used to register.
