Event overview

Online event

April 15, 2026

7:00 pm to 8:30 pm

This is a program for teens in grades 10 –12 and parents or guardians.

Please register with the email where you would like to receive the Zoom link for this virtual presentation.

Artificial intelligence is already changing how work gets done, what skills matter, and how people begin their careers. Many of these changes are happening while today's students are still in high school, creating both uncertainty and new opportunities.

In this session, participants will learn how AI is being used in the workplace, what skills will remain valuable, and how to prepare. We'll also discuss AI as a tool for exploring career choices.

Presenter Bio:

Adina Gray is a business school faculty member at Thompson Rivers University and the founder of PurpleOwl AI, where she helps educators, students and professionals understand how artificial intelligence is changing work and careers.

With over 20 years of experience in higher education, she focuses on helping people build practical AI skills and prepare for the future of work. Adina regularly speaks at international conferences and delivers AI training for universities, school districts, and organizations across Canada, the United

States, Latin America and Europe.

Last year she was a finalist in the Women in AI North America Awards and received the AI Innovator Award at the AI Revolution Show in San Diego. Her work focuses on helping students and professionals understand how to work effectively with AI in their studies and careers.

Registration is closed.
