Keep yourself safe during extreme heat events

Follow these tips from [North Shore Emergency Management \(NSEM\)](#) to help prepare for and endure extreme heat events:

Keep cool and hydrated

- Drink plenty of cool fluids, especially water (avoid sugary, caffeinated, or alcoholic drinks)
- Take cool baths or showers to bring your body temperature down
- Wet your clothing during the day, or sheets at night
- If you don't have air conditioning, go to a local library, community centre, or mall
- Check twice a day on friends and family members who are elderly or have special needs

At home

- Monitor indoor temperatures: heat risks increase at 26°, and significantly increase at 31°; consider staying with family or friends if you are in an 'at risk' group and live in a building where inside temperatures might be above 31°
- Cover windows that receive morning or afternoon sun with drapes, shades, or awnings
- Sleep in your home's coolest location (usually the lowest part)
- Wear loose natural fibre clothing that breathes well
- Limit stove or oven use

Away from home

- Spend time in shaded and breezy outdoor spaces
- Stay in climate-controlled buildings as long as possible
- Wear a wide-brimmed hat, sunglasses and sunscreen (SPF 15 or higher)
- Wear light weight, loose fitting, light-coloured clothing
- Reduce, eliminate, or reschedule strenuous activities to the coolest time of the day
- If working outside, monitor coworkers and have them do the same for you

Stay connected

- Live alone? Find an extreme heat buddy; check in on each other a few times a day
- Do you have vulnerable family members in a higher risk group? Check in, ideally in person
- Be a good neighbour; check in on friends / neighbours

- Got air conditioning? Share it!

Caring for pets

- Never leave pets in parked cars during hot temperatures
- Bring pets inside during the hottest time of the day
- Provide plenty of fresh water and shade for outdoor pets

Get help & information

If you require emergency services, **call 9-1-1** for police, fire and ambulance assistance.
